

Learn How Your Business Can Benefit from Cogeneration

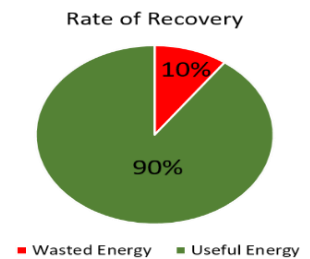

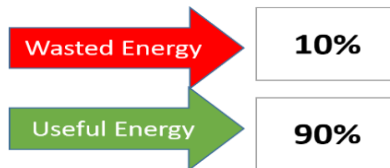

What is Cogeneration?

Cogeneration or combined heat and power (CHP) is an efficient and cleaner way of generating electric power and thermal energy from a single fuel source. The engine drives the generator, producing electricity, and the residual heat created during this process is recaptured and turned into useful heat (heating, cooling or steam). Cogeneration has a proven track record of achieving RM1.4 million savings per year based on 1 Mega Watt of electricity generated.

Cogeneration System

Benefits of Cogeneration

Save Money

Industry leading efficiencies. That means you can cut your energy cost by 40% & focus on what's really important.

Increase Reliability

Power outages are threatening your business success. Cogen system provide reliable power independent of weather & time.

Be Sustainable

Meet the highest environment standard. Lower CO₂ emission by 60%.

Be Independent

Energy prices are increasing. Be your own energy supplier & take back control over your own energy cost.

Workshop on Awareness & Benefits of Cogeneration

Date : 20th August 2019

Venue: Concorde 1 Ballroom, Concorde Hotel Kuala Lumpur, 2 Jln Sultan Ismail, Kuala Lumpur.

Open

Complimentary and By Invitation Only. Contact Us at secretariat@malaysiangas.com or call +603 2166 5135

Workshop on Awareness & Benefits of Cogeneration

20th August 2019

Concorde 1 Ballroom (Ground Floor), Concorde Hotel Kuala Lumpur
2, Jalan Sultan Ismail, 50250 Wilayah Persekutuan Kuala Lumpur

TIME	TOPIC
8.30 am	Registration & Networking
9.00 am	Opening Remarks
	Introduction to MGA
	Part 1: Introduction to Cogeneration Part 2: Benefits & Application of Cogeneration
10.45 am	<i>Coffee Break</i>
11.15 am	Part 3: Ways to Make Cogeneration Work Part 4: Case Studies
12.45 pm	<i>Lunch</i>
2.00 pm	Meet the Experts
3.00 pm	<i>End</i>

COMPLIMENTARY REGISTRATION by INVITATION ONLY
